Subject: RE: Inquiry Regarding Bidding Opportunity for Ablution Facilities in Lephalale

Good day,

I hope you are well.

We are not aware of any tenders or projects related to the construction of ablution facilities in the Lephalale area.

Our role is limited to providing environmental consulting services for the Environmental Authorisation process associated with the proposed Wet Flue Gas Desulphurisation (WFGD) Waste Disposal Sites for Medupi Power Station. As part of the public participation process, we informed interested and affected parties about the project and erected site notices in accordance with the applicable environmental legislation.

I trust you will find the above in order.

Kind Regards,

Subject: Inquiry Regarding Bidding Opportunity for Ablution Facilities in Lephalale

Dear Selahle,

I hope this message finds you well.

We recently came across an enquiry related to the construction of ablution facilities in the Lephalale area. We are very interested in this project and would like to inquire if there is an opportunity for us to participate in the bidding process.

Please let us know if there are any specific requirements or documentation needed to be considered for the tender.

We look forward to your response and the possibility of collaborating on this project.

Thank you for your time and assistance.

Best regards,

Enrico Nkwanyana

Subject: RE: Registration form as I&A parties - Medupi FGD

Good morning,

I hope you are well.

Thank you for raising your concerns regarding potential dust impacts and the effects of the proposed WFGD Waste Disposal Facilities on the local road network.

Your concerns have been noted and will be included in the Environmental Impact Assessment (EIA) process for consideration by the relevant specialists and decision-making authorities.

With regard to dust generation, the potential cumulative impact of dust emissions from the proposed WFGD Waste Disposal Facilities, together with existing sources such as the Matimba and Medupi Ash Disposal Facilities (ADFs), will be assessed as part of the environmental assessment process. Appropriate mitigation measures to minimise dust generation during both the construction and operational phases of the project will be identified and incorporated into the Environmental Management Programme (EMPr), where necessary.

Regarding the road network, the potential impact of construction and operational traffic on existing roads, including increased traffic volumes, road safety, and road deterioration, will also be considered during the assessment process. Mitigation measures will be recommended where potential impacts are identified.

All comments received from Interested and Affected Parties form part of the EIA process and will be included in the Comments and Responses Report submitted to the competent authority for consideration during decision-making.

We appreciate your participation in the process. We will add you to our database and you will be kept updated about the progress of the project application.

Kind Regards,
